

Indiana Soybean Alliance Indianapolis, IN

Indiana Soybean Alliance hired IFS to remodel several spaces within their business suite.

IFS Scope of Work

A long-term property management and facilities maintenance client, Indiana Soybean Alliance hired IFS to renovate several spaces within their 20,000 SF suite. Integrated Facility Services sister company, Lauth, completed the original build out for the tenant in 2015. IFS and Lauth's property management teams have maintained the space for the client since the completion of the original space.

The scope of work included:

- Addition of a food and beverage serving station in a conference room
- Creation of a wellness room
- Addition of an alcove in the lobby for a television monitor

Results

Utilizing a flexible construction schedule to accommodate minimal interruption to the client's business operations, the project was completed within budget and to the client's satisfaction.

"We appreciate how responsive IFS is to our needs. As an advocate for Indiana Soybean Alliance, they are proactive versus reactive on the maintenance side of the business. They catch things before they go wrong. This is a valued attribute."

—C. Rammel, Indiana Soybean Alliance
